

Kader Sarıkaya

Frontend Developer

[Email](#) [Linkedin](#) [Github](#) [Medium](#)

## Objective:

I am a design and technology enthusiast, React developer with more than 3 years of experience. I am dedicated to creating seamless user experiences and staying up-to-date with the latest front-end development trends. I am excited to join a team where I can learn and grow as a developer.

## Education:

Bachelor of Science in Computer Engineering, Cukurova University, 2018-2023

*Courses:* Data Structures, OOP, Algorithms, Machine Learning, Artificial Intelligence

## Skills:

React, Next.js, HTML, CSS, JavaScript, Node.js, MongoDB, Material UI, Tailwind CSS, Figma, React Native, Three.js, TypeScript, Python-Django

## Work Experience:

### Frontend Developer, Bionluk (Freelance)

January 2023 - Present

- As a Freelance Frontend Developer at Bionluk, I designed unique and userfriendly interfaces using React and Next.js based on client requirements. I also developed my project management skills and gained significant experience in time management.
- Developed and maintained the front-end of the platform using React, Next.js,

### Software Development Intern, Turna.com (Remote)

June 2021 - August 2021

- Worked on developing and maintaining the web application using C#, JavaScript, JQuery, and MsSQL.
- Participated in Agile/Scrum meetings to discuss project progress and prioritize tasks.

## Hackathons/Bootcamps:

- Upschool Blockchain developer program with Solana - Participated in a 3month bootcamp.
- Won first prize at the UpSchool Solana Blockchain hackathon.
- Participated in the Akbank Refi Hackathon with my university club.
- Currently in a Frontend Developer bootcamp organized by VeriLab

## Projects:

- Cukurova Block Website - Developed a website for the university club using Next.js, Tailwind CSS, TypeScript, Framer Motion, and Sanity. [Github](#) | [Website](#)

- Recipe Sharing Mobile App: In this project, I developed a mobile application using React Native that focused on recipe sharing among users. The application utilized the MERN (MongoDB, Express.js, React, and Node.js) stack for its backend infrastructure. [Github](#)
- Cards of Dragon - Developed a game website using React and TypeScript. [Website](#) | [Github](#)
- Figma to React – Rebuilt solana ecosystem page according to Figma design [Website](#) | [Github](#)
